

Question 41 of 307

HOTSPOT

A company uses Dynamics 365 Business Central.

The company plans to configure a customer card based on the following requirements:

- Process payments through a bank account.
- Bill a different customer for invoices.
- Print invoices in a specific language.

You need to configure the customer card.

Which components should you use? To answer, select the appropriate options in the answer area.

Answer Area

Requirement	Component
Process payments through a bank account.	Payment Terms Code Payment Method Code Preferred Bank Account
Bill a different customer for invoices.	Contact name Bill-to customer Ship-to code
Print invoices in a specific language.	Country/Region code Language code Responsibility center

Suggested answer

Answer Area

Requirement	Component
Process payments through a bank account.	Payment Terms Code Payment Method Code Preferred Bank Account
Bill a different customer for invoices.	Contact name Bill-to customer Ship-to code
Print invoices in a specific language.	Country/Region code Language code Responsibility center

Question 42 of 307

HOTSPOT

A company uses Dynamics 365 Business Central.

The company plans to implement a cash receipt journal batch based on the following requirements:

- The cash receipt journal batch must use a bank account by default.
- The cash receipt customer payments must be archived automatically in the posted journals.

The company uses the accrual basis for accounting.

You need to configure the cash receipt journal batch.

Which options should you use? To answer, select the appropriate options in the answer area.

Answer Area

Requirement	Option
Cash receipt journal batch must use a bank account.	Bank Account under Bal. Account Type G/L account under Bal. Account Type Customer under Bal. Account Type Vendor under Bal. Account Type
Cash receipt customer payments must be archived in posted journals.	Posting No. Series Copy to Posted Jnl. Lines Suggest Balancing Amount Reason Code

Answer Area

Requirement	Option
Cash receipt journal batch must use a bank account.	Bank Account under Bal. Account Type G/L account under Bal. Account Type Customer under Bal. Account Type Vendor under Bal. Account Type
Cash receipt customer payments must be archived in posted journals.	Posting No. Series Copy to Posted Jnl. Lines Suggest Balancing Amount Reason Code

Question 43 of 307

A company is using Dynamics 365 Business Central. The finance manager creates a new general ledger (G/L) account.

You need to configure the system to include the G/L account in the general journal reconciliation window.

What should you do?

Answer choices

- A Add this G/L account to the Bank Account Posting Group.
- B Enable the Direct Posting field in the G/L account card.
- C Enable the Reconciliation Account field in the G/L account card.
- D Create a new payment reconciliation journal.

CORRECT ANSWER IS C

To include a G/L account in the general journal reconciliation window in Dynamics 365 Business Central, you must enable the Reconciliation Account field in the G/L account card. This setting allows the system to recognize the account as relevant for reconciliation purposes.

Question 44 of 307

You are a functional consultant configuring items in Dynamics 365 Business Central.

You are configuring multiple units of measure for an item that has a base unit of measure of PCS and an additional unit of measure of BOX. One BOX holds 20 PCS of an item.

You need to define the relationship between the units of measure.

Which value should you populate on the Item Units of Measure page for the item?

Answer choices

A For the BOX unit of measure, set the Qty. per Unit of Measure to 0.05.

B For the BOX unit of measure, set the Qty. per Unit of Measure to 20.

C For the PCS unit of measure, set the Qty. per Unit of Measure to 0.05.

D For the PCS unit of measure, set the Qty. per Unit of Measure to 20.

CORRECT ANSWER IS B

To define the relationship between the units of measure where one BOX holds 20 PCS, you should set the Qty. per Unit of Measure for the BOX unit of measure to 20. This means that when you enter a quantity of 1 BOX, the system will automatically translate it to 20 PCS, ensuring accurate conversion and inventory management.

Question 45 of 307

DRAG DROP

A company uses Dynamics 365 Business Central.

You need to duplicate a company based on the existing Dynamics 365 Business Central company.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Open the data migration task.	
Select tables to copy.	
Select the Copy function.	
Use the New function.	
Add the new company name.	
Open the assisted setup page.	
Open the Companies page.	
Select a company to copy.	

Suggested answer

Answer area
Open the Companies page.
Select a company to copy.
Select the Copy function.
Add the new company name.

Question 46 of 307

DRAG DROP

You set up a new company for a client. The client provides you with a Microsoft Excel file that contains master data for vendors and vendor bank accounts details.

You need to import vendor master data and relevant bank account details by using a configuration package.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Import one Excel template that contains vendor and vendor bank account data.	
Import two separate Excel files into the package, one for vendor data and one for bank account data.	
Define the Vendor table as a parent in Parent Table ID for VendorBankAccount table.	
Create a configuration package.	
Define the VendorBankAccount table as a parent in Parent Table ID.	
Select Apply package on the header.	

CORRECT ANSWER

Suggested answer

Answer area
Create a configuration package.
Import one Excel template that contains vendor and vendor bank account data.
Define the Vendor table as a parent in Parent Table ID for VendorBankAccount table.
Select Apply package on the header.

Question 47 of 307

A company uses Dynamics 265 Business Central.

The company plans to use multiple unit prices for the same items from different vendors.

You need to configure the purchase price of the items.

In which two locations can you configure the purchase price? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Answer choices

A Purchase order

B Resource prices

C Vendor card

D Customer card

E Item card

CORRECT ANSWER IS C AND E (CE)

Question 48 of 307

HOTSPOT

A client plans to implement Dynamics 365 Business Central.

You need to configure the system.

Which value posting type should you use? To answer, select the appropriate options in the answer area.

Answer Area

Requirement

Allow the user to change the default dimension value for the account type in a transaction.

Value posting type

▼

Code Mandatory
Same Code
No Code

Prevent the user from posting a transaction without a dimension value for the account type.

▼

Code Mandatory
Same Code
No Code

Ensure that Business Central only accepts the default dimension value set for the account type in a transaction.

▼

Code Mandatory
Same Code
No Code

Suggested answer

Answer Area

Requirement

Allow the user to change the default dimension value for the account type in a transaction.

Value posting type

▼

Code Mandatory
Same Code
No Code

Prevent the user from posting a transaction without a dimension value for the account type.

▼

Code Mandatory
Same Code
No Code

Ensure that Business Central only accepts the default dimension value set for the account type in a transaction.

Question 49 of 307

DRAG DROP

A company implements Dynamics 365 Business Central.

The company must import the following opening balances into Dynamics 365 Business Central:

- Item
- Bank
- Customer

You need to implement tools to import opening balances.

Which components should you use? To answer, drag the appropriate components to the correct opening balances. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Components	Answer Area	
	Opening balance	Component
General journal	Item	
Bank account reconciliation	Bank	
Item journal	Customer	

Suggested answer

Answer Area	
Opening balance	Component
Item	Item journal
Bank	Bank account reconciliation
Customer	General journal

Question 50 of 307

DRAG DROP

A company implements Dynamics 365 Business Central.

The company stores master data for vendor opening balances in an Excel file. MOST of the vendors use a foreign currency for open balances. The balancing account is preselected on the journal batch.

You need to import the vendor opening balances by using configuration packages.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer area	
Select the fields in the following processing order: Account Type, Account No., Posting Date, Document No., Description, Amount (LCY), Currency, and Amount.		1	
Import the Excel file and validate the relationship. Then apply the data and post to the general journal.	>	2	⬆
Select the fields in the following processing order: Account Type, Account No., Posting Date, Document No., Description, Amount, Amount (LCY), and Currency.	<	3	⬇
Import from Excel and then post to the general journal.		4	
Export to Excel from the configuration package and populate the data.			
Select the fields in the following processing order: Account Type, Account No., Posting Date, Document No., Description, Currency Code, Amount, and Amount (LCY).			
Create a configuration package for table 81 Gen. Journal Line.			

CORRECT ANSWER

Answer area	
1	Create a configuration package for table 81 Gen. Journal Line.
2	Export to Excel from the configuration package and populate the data.
3	Select the fields in the following processing order: Account Type, Account No., Posting Date, Document No., Description, Currency Code, Amount, and Amount (LCY).
4	Import the Excel file and validate the relationship. Then apply the data and post to the general journal.

Question 51 of 307

DRAG DROP

A company uses Business Central. The company recently restructured. The company has only a few posted entries.

You need to change the Global Dimensions in Business Central to reflect the restructure.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Update Global Dimensions in parallel order.	
Select Parallel Processing on the Change Global Dimensions page.	
Select new dimension codes in the dimension fields.	⬅
Update Global Dimensions in sequential order.	➡
On the General Ledger Setup page, select Change Global Dimensions.	⬆

Suggested answer

Answer Area
On the General Ledger Setup page, select Change Global Dimensions.
Update Global Dimensions in sequential order.
Select new dimension codes in the dimension fields.

Question 52 of 307

HOTSPOT

- -

Case study

- -

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

- -

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

- -

Northwind Traders is an independent, family-owned business. The company distributes natural pet products in the Northwest region of the country/region. Products are purchased directly from manufacturers and distributed by using its own fleet of trucks.

When the company started, deliveries were within a three-hour radius of the warehouse. Due to regional growth, current deliveries require drivers to stay overnight on some routes. The company plans to open a second warehouse to expand the region and eliminate overnights for route drivers. The company also plans to hire a second group of

employees to run operations in this new location. The finance and accounting teams will remain in the original location.

The company uses a third-party system for financials and order management. The finance department stated that the company's fiscal year begins on July 1 and ends on June 30. The mm/dd/yyyy date format is used.

As part of the expansion, the owner plans to upgrade to an ERP system and use Business Central to fulfill the company requirements and manage growth.

Current environment

- -

Orders

- Orders are emailed to customer service and manually keyed into the inventory system.

Pricing and discounts

- Customer pricing is determined by the customer market type. Customer market types are Retail, Veterinarian, and Breeder. Each customer is associated with only one market type.
- Vendors offer monthly promotions to customers by item, brand, or item category.
- Invoices should show each customer's base price, the discount amount, and the net price.

Accounts payable

- The company wants to expand vendor payment options in the new system.

Requirement

- -

Customers

- The sales team must be able to do the following:
 - o Quickly set up new customers with the proper settings based on customer type.
 - o Identify customers by market type. Customer posting groups will be used to identify which market the customer belongs to.
- Base price is determined by the customer market type.

- The sales department should receive a warning when entering the order if a customer is over their credit limit.

Sales

- Customer discounts are offered for specific time frames by item, brand, or product category. Discounts should be added to sales lines automatically.
- Discounts must post to a unique general ledger (G/L) account.
- The business needs to be able to track revenue by location, market, and product category dimensions. Locations 100 and 200 will be set as default dimensions on the two warehouse locations. Food, treats, toys, and supplies are the required product categories, which will be set as default dimensions on the item cards. Each customer card will have a default market dimension.
- The sales manager wants to delete canceled orders and automatically archive them.

Warehouse

- Orders will be fulfilled from two possible warehouse locations.
- Product will be transferred between locations by using transfer orders.

Sales invoices

- Invoices will be posted after delivery.
- Invoices will be emailed to the customer.
- The sales department must be able to quickly correct posted invoices for the following scenarios:
 - o Posted invoices that have not been paid.
 - o Posted invoices that have been paid.
 - o Posted invoices created from sales orders.
 - o Posted invoices not created from sales orders.

Accounting

- The finance department requires that the company has 12 monthly accounting periods per fiscal year.
- Finance department users must be able to reconcile the accounts receivable (AR) subledger to the G/L account at month end.

- AR department users need the ability to settle and close invoices when customers take payment discounts after the payment discount date has passed. AR users should be allowed to accept or reject the payment tolerance.
- Accounts payable (AP) department users must be able to pay vendors by electronic funds transfer (EFT) and use a payment journal batch named EFT to process payments.
- When viewing G/L entries, the finance and accounting teams must be able to see debits and credits instead of a positive or negative amount.
- The company needs to be able to track expenses by department and location. The departments are sales, operations, and administration.
- AR must be able to correct cash application entries.

Issues

- -

Payment application

- Customers may have several stores that are responsible for their own orders and payments.
- Occasionally, AR clerks mistakenly apply payments to the incorrect customer invoice.

Invoicing

- When items are delivered, customers refuse the items for reasons such as damaged or wrong item.
- After the invoices are posted, they must be corrected, which is time-consuming.

Warehouse

- The sales department and warehouse managers must have visibility into products that are in the process of being transferred between locations.

Accounts

- Customer accounts are difficult to view by market type.
- The finance team does not have the ability to report revenue by customer type.

Accounting

- AR users often find variances between the AR subledger and G/L account.

- Customers often take the payment discount after the payment discount date has passed, leaving open invoices for small amounts.
- The AP department is unable to pay vendors by EFT in the current system.
- Finance and accounting team members have trouble validating postings when they use only the amounts field on G/L entries.
- The finance department is unable to run financial reports by market. All revenue postings must reference a market.

You need to configure retail store customer cards to track revenue by market.

Which configuration should you use? To answer, select the appropriate option in the answer area.

Answer Area

Action

Assign the dimension code.

Configuration

▼

Market

Question 53 of 307

DRAG DROP

• -

A company plans to set up an approval process for purchase orders in Business Central.

The approval process must automatically send out an approval request as soon as a purchase order is created. Purchase orders that require approval must be for an amount of \$600 or more.

You need to configure the approval workflows.

Which areas should you configure for each use case? To answer, drag the appropriate areas to the correct use cases. Each area may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Areas		Answer Area		Areas
Approval User Setup		Use case Activate the notification to be sent when a new purchase order is created. Configure the approval limit for purchase orders. Allow the user to receive notifications immediately.		
Notification Schedule	•			
Workflow User Group	•			
Workflow Notification Setup	•			

CORRECT ANSWER

Answer Area		Areas
Use case Activate the notification to be sent when a new purchase order is created.		Workflow Notification Setup
Configure the approval limit for purchase orders.		Approval User Setup
Allow the user to receive notifications immediately.		Notification Schedule

Question 54 of 307

You are configuring Dynamics 365 Business Central security settings.

You assign the following permission sets to a Users permissions.

Permission set	Object type	Object ID	Insert permission
CustomerMgmt	Table data	18 (Customer)	Yes
ReceivablesMgmt	Table data	18 (Customer)	Blank

You need to determine how the system handles the user's permissions.

What is the outcome of the user permission configuration?

Answer choices

A The Yes option will allow a user to create a new customer.

B The permission set order will allow a user to create a new customer.

C The Blank option will allow a user to create a new customer.

Correct answer: A

In Dynamics 365 Business Central, permissions are typically cumulative, which means that if a user has multiple permission sets assigned, the most permissive rights are granted. In this case, the user has two permission sets: CustomerMgmt with Insert permission set to 'Yes' for the Customer table and ReceivablesMgmt with Insert permission set to 'Blank' for the same table. Since the 'Yes' permission is more permissive than 'Blank', the user will be allowed to create a new customer. Therefore, the outcome of the user permission configuration is that the user will be able to create a new customer.

Question 55 of 307

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to transfer opening balances data into the system.

Solution: Import the data by using comma-separated values (CSV) files.

Does the solution meet the goal?

Answer choices

A Yes

B No

Correct answer: A

Using comma-separated values (CSV) files to import opening balances data into the system is a valid and commonly used method. CSV files are straightforward to create and manipulate and are widely supported by various data import tools. Therefore, the solution meets the goal.

Question 56 of 307

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to transfer opening balances data into the system.

Solution: Use RapidStart Services to import the data.

Does the solution meet the goal?

Answer choices

A Yes

B No

Correct answer: A

RapidStart Services is a tool within Microsoft Dynamics 365 Business Central that is designed for setting up new companies, configuring the application, and for importing initial balances or opening balances data into the system. As the question specifically asks for a solution to transfer opening balances data into the system, using RapidStart Services would meet the goal.

Question 57 of 307

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to transfer opening balances data into the system.

Solution: Perform data migration by using the Data migration assisted setup wizard.

Does the solution meet the goal?

Answer choices

A Yes

B No

Correct answer: B

The Data migration assisted setup wizard is primarily used for migrating master data, such as customers, vendors, and items. It is not typically used for transferring opening balances data, which requires a different process, often involving journal entries specifically designed for opening balances. Therefore, the solution does not meet the goal.

Question 58 of 307

DRAG DROP

A company uses Dynamics 365 Business Central.

The finance manager requires a specific group of operating team users to have access only to a particular set of customer data.

You need to configure and enforce the security requirements.

Which pages should you configure? To answer, move the appropriate pages to the correct requirements. You may use each page once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Pages		User security Requirement	Page
User Card		Create security rules that will grant users required access.	
Profiles (Roles)		Assign the predefined security rule sets to the requested users.	
Permission Sets			
Microsoft 365 admin center			

Suggested answer

User security Requirement	Page
Create security rules that will grant users required access.	Permission Sets
Assign the predefined security rule sets to the requested users.	User Card

Question 59 of 307

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to transfer opening balances data into the system.

Solution: Transfer balances by using the Copy Company function.

Does the solution meet the goal?

Answer choices

A Yes

B No

Correct answer: B

The Copy Company function transfers the entire company data, not just specific data like opening balances. When the goal is to transfer only the opening balances, using the Copy Company function would not meet the stated goal. Therefore, the solution does not meet the goal.

Question 60 of 307

A company recently implemented Business Central. The company uses Teams extensively for day-to-day collaboration.

The company finance manager **MUST** be able to search for contacts and share Business Central records in Teams.

You need to install the Business Central app in Teams.

What should you do first?

Answer choices

A Select the Share action on Attachment Documents in Business Central.

B Search for Teams App Centralized Deployment in Business Central.

C Add a Planner tab to a team channel.

D Manage apps in the Business Central admin center.

Correct answer: D

To install the Business Central app in Teams, the first step should be to manage apps in the Business Central admin center. This option allows for centralized management and deployment of applications within Business Central, ensuring that the necessary app is correctly set up and integrated with Teams.
