

Question 61

DRAG DROP

A company adds a user to Microsoft 365.

Existing security groups do not have the required permission sets for newly added users.

You need to assign a Dynamics 365 Business Central security group and permissions to the user and the company.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Pull the Security Group in Business Central.

Assign the user to the company.

Create a Microsoft 365 Security Group.

Assign permissions to a security group.

Assign the company to the user.

Select **Get New Users from Microsoft 365 / Update Users from Microsoft 365**.

Answer area

Suggested answer

Answer area

Assign the user to the company.

Select **Get New Users from Microsoft 365 / Update Users from Microsoft 365**.

Create a Microsoft 365 Security Group.

Pull the Security Group in Business Central.

Assign permissions to a security group.

Question 62

DRAG DROP

A manufacturer uses Dynamics 365 Business Central.

The company has the following item types:

- Raw Materials
- Work-in-progress (WIP)
- Finished Goods

Different prefixes are used for item numbers to identify these item types.

The company requires the following system setup:

- Use a unique number series for each item type.
- No. Series must be selectable when creating manual items.
- Implement automatic number assignment.

You need to configure the system.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Number series configuration
Enable the ability to use default numbers.	
Create a number series.	
Create relationships between the number series.	
Set the default number series on the Inventory Setup page.	

Suggested answer

Number series configuration
Enable the ability to use default numbers.
Create a number series.
Create relationships between the number series.
Set the default number series on the Inventory Setup page.

Question 63

A company uses Business Central and plans to automate its processes by using Power Automate.

The company finance manager wants to restrict access to Power Automate features. Only trained users must be able to create and run instant flows in Business Central.

You need to set up access control for specific users.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

As an administrator, agree to the integration notice on the Privacy Notices Status page on behalf of all users or allow users to decide themselves.

Validate that authorized users have the Automate Action permission.

Add the system permission Allow Action Automate (ID 9630) to the assigned permissions sets.

As an administrator, disagree to the integration notice on the Privacy Notices Status page on behalf of all users.

Remove the system permission Allow Action Automate (ID 9630) from the assigned permissions sets.

Power Automate integration with Business Central

Suggested answer

Power Automate integration with Business Central

As an administrator, disagree to the integration notice on the Privacy Notices Status page on behalf of all users.

Add the system permission Allow Action Automate (ID 9630) to the assigned permissions sets.

Validate that authorized users have the Automate Action permission.

Question 64 of 307

You need to transfer opening balances data into the system.

Solution: Use a configuration package to import the data.

Does the solution meet the goal?

Answer choices

A Yes

B No

Correct answer: A

Using a configuration package to import data is a straightforward and effective method for transferring opening balances into the system. Configuration packages are designed specifically for importing a variety of data types, including financial data such as opening balances. As long as the configuration package is appropriately set up, it will successfully meet the goal of transferring opening balances data.

Question 65

HOTSPOT

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

-

To display the first question in the case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Background

-

Fabrikam, Inc., is a manufacturer of products for the gift industry. The company plans to implement Business Central as its new enterprise resource planning (ERP) system.

The company sells to two types of customers: wholesale and retail. Retail customers order at special events and online. Wholesale customers send in orders by email.

Current Environment

-

Order processing

-

- The company uses a purchase order (PO) workflow for any PO over \$500.
- The system has been fully configured for sales order prepayments and will check for a prepayment invoice at posting.

- Customers can special order products with a prepayment that is due on receipt.

Invoicing

-

- Wholesale customer payment terms are net 30, with a 2% discount if paid within 10 days.
- Retail customer payment terms are payable on receipt or shipment.

Reporting

-

- The company uses headcount (number of employees) and square footage for statistical accounts.

Integrations

-

The company currently uses Outlook, Excel, Word, and Teams to communicate internally and externally with customers and vendors.

Requirements

-

Order processing

-

- The company must be able to combine multiple purchase receipts into one vendor invoice.
- Posted vendor invoices must be reverted when damages are reported or a product is returned to the vendor.
- Fully invoiced POs must not appear on the PO list page.
- Customer prepayments vary based on customer relationship. Special orders from new customers have a 25% prepayment. Established customers have only a 15% prepayment.
- The company must be able to approve POs by email without opening Business Central.
- Customers often reorder the same items with similar quantities. The system must be configured to ask the user if recurring lines should be added to sales orders.

Invoicing

-

- Customer revenue must be posted to separate general ledger (G/L) accounts based on customer type. The G/L account must have subcategories for wholesale and retail revenue.
- Accounts receivable must be posted to separate G/L accounts based on customer type. The G/L account must have subcategories for wholesale and retail accounts receivable.
- Currently, inventory is sold at a cost based on purchase and sales over a period.

Reporting

-

- Financial reports must include statistical accounts.
- The financial report structure must map to account categories.

Integrations

-

The company requires the following integration capabilities:

- Create sales orders while collaborating with customers by email.
- Edit customer information while messaging the sales team in a group chat.
- Communicate a brochure to all customers at once about a sales campaign.

General ledger posting accountsThe company requires the following G/L posting accounts:

- Retail Receivables = 13100
- Wholesale Receivables = 13200
- Payment Discount = 54800
- Retail Sales = 44100
- Wholesale Sales = 44200
- Sales Prepayments = 22160

Issues

-

- Order entry takes too long for wholesale customers.

- Vendors ship partial orders but send one monthly invoice. The company is unable to associate one invoice with multiple POs in the current environment.
- Inventory reconciliation was difficult in the company's old system because it allowed users to sell more inventory than was physically available.
- Users must log in to the system to provide workflow approvals.

You need to recommend integration solutions to fulfill the company requirements.

Which Microsoft integration aligns with each requirement? To answer, select the appropriate options in the answer area.

Question 68 of 307

You are setting up a new company for a customer.

The customer wants to sell items in boxes and pallets, but refer to the items as pieces. Each box contains 12 pieces. Each pallet contains 144 pieces. You need to assign the unit of measures to items.

How should you assign the unit of measures?

Answer choices

A Create Box as a base unit of measure. Add Pieces as an item unit of measure with the quantity per unit set to 0.08333.

B Create Pallet as a base unit of measure. Add Pieces as an item unit of measure with the quantity per unit set to 0.0069.

C Create Pallet as a base unit of measure. Add Box as an item unit of measure with the quantity per unit set to 0.08333.

D Create Pieces as a base unit of measure. Add Pallet as an item unit of measure with the quantity per unit set to 144.

Correct answer: D

Question 69 of 307

A company uses Dynamics 365 Business Central.

Functional users at the company must learn the data model behind pages to assist with troubleshooting

You need to explain what users can inspect by using the Page Inspection pane.

Solution: View performance information on installed extensions that affect the selected page or its source table.

Does the solution meet the goal?

Answer choices

A Yes

B No

Correct answer: B

Question 70 of 307

A customer is using Dynamics 365 Business Central.

The customer is currently sending quotes and invoices using postal services. The customer wants to begin sending quotes and invoices by email directly from Business Central.

You need to configure outbound email.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

A Run the Set up your Business Inbox in Outlook assisted setup tool.

B Run the Email setup assisted setup tool.

C Run the Set up email logging assisted setup tool.

D Configure Email Accounts options.

Correct answer: BD

Question 71 of 307

DRAG DROP

A company is implementing Dynamics 365 Business Central.

You need to create a new company that is configured similarly to an existing company. The existing company has data that must be used as a template for the new company.

Which tools should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Tools	Requirement	Tool
Assisted Setup	Create the first essential data components of a company, such as the company name.	
Configuration package	Run a series of setup tasks in a specific order and manually mark the tasks as completed once the tasks are finished.	
Configuration Questionnaire	Template the existing data and apply the template to the new company in a single process.	

Suggested answer

Tools	Requirement	Tool
Assisted Setup	Create the first essential data components of a company, such as the company name.	
Configuration package	Run a series of setup tasks in a specific order and manually mark the tasks as completed once the tasks are finished.	
Configuration Questionnaire	Template the existing data and apply the template to the new company in a single process.	

Question 72

A company uses Business Central.

The company requires the ability to track user logins.

You need to configure the system so administrators can monitor user activities.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point

Answer choices

A Configure User Setup.

B Enable time registration in General Ledger setup.

C Manage the Sessions page in the admin center.

D Access the User Time Register page.

Correct Answers: A, B

Question 73 of 307

You are setting up a new company for a customer.

The customer wants to sell items in boxes and pallets, but refer to the items as pieces. Each box contains 12 pieces. Each pallet contains 144 pieces.

You need to assign the unit of measures to items.

How should you assign the unit of measures?

Answer choices

A Create Boxes as an item unit of measure with a quantity per unit of measure set to 1.

B Create Pieces as a base unit of measure. Add Box as an item unit of measure with the quantity per unit set to 12.

C Create Pallet as a base unit of measure. Add Pieces as an item unit of measure with the quantity per unit set to 0.0069.

D Create Box as a base unit of measure. Add Pallet as an item unit of measure with the quantity per unit set to 12.

Correct Answer: B

Question 74 of 307

A company is implementing Dynamics 365 Business Central.

The company must be able to assign transactions to unique and sequential numbers. Some transactions require multiple number series that can be used interchangeably.

You need to configure number series to meet the requirements.

What should you do?

Answer choices

A Define number series codes on journal templates.

B Create relationships between number series.

C Enable transaction tracking.

D Set up approval workflows.

Correct Answer B

Question 75 of 307

DRAG DROP

- -

A company is implementing Dynamics 365 Business Central. The customer service team communicates daily with the customers by using Outlook.

The customer service team requires the following functionality in Outlook:

- Look up a business contact in Business Central when composing an email.
- Create a sales quote and send it back to a customer without leaving Outlook.
- Open a document in Business Central from the document number mentioned in an incoming email.

You recommend that the team install the Business Central add-in for Outlook.

You need to recommend which add-in options the customer service team should use to meet the requirements.

Which options should you recommend? To answer, move the appropriate options to the correct functions. You may use each option once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

Microsoft 365 Outlook integrations		
Options	Function	Option
Contact insights	Look up Business Central contacts when composing email.	
Document Link	Create and send a sales quote without leaving Outlook.	
Sync with Microsoft	Open a document mentioned in an incoming email.	
Incoming Documents		

Suggested answer

Microsoft 365 Outlook integrations

Function	Option
Look up Business Central contacts when composing email.	Contact insights
Create and send a sales quote without leaving Outlook.	Contact insights
Open a document mentioned in an incoming email.	Document Link

Question 76 of 307

A company uses Business Central.

A finance manager must ensure compliance with accounting standards by accurately recording financial transactions based on the document date and the posting date.

You need to configure the system to synchronize document dates and posting dates on purchase documents.

What should you configure?

Answer choices

A Purchases & Payables Setup

B Feature Management page

C General Ledger setup

D Document Sending Profiles

Correct Answer A

Question 77 of 307

HOTSPOT

- -

A company is implementing Dynamics 365 Business Central.

The purchase manager plans to implement workflows for purchase order and vendor approvals. The workflows must be able to send notifications for new records and approval requests instantly by email.

All users require the same notification setup.

You need to set up the workflow notifications.

Which configurations should you use? To answer, select the appropriate options in the answer area.

Configure workflow notifications

Requirement

Use the same notification setup for all users.

Send notifications for new records and approval requests.

Configuration

My notifications
Workflow notification setup
Change notification settings
Notification setup on approval users

Question 79 of 307

A manufacturing company uses Dynamics 365 Business Central.

The company MUST be able to send sales documents and purchase orders to customers and vendors.

You need to set up email accounts to provide email access to users.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Answer choices

A Assign email accounts based on the scenarios for which they are required.

B Delegate which partner admins can use the tenant email account.

C Set a limit on the number of messages an account user can send.

D Specify who can view messages sent from other users.

Correct Answer: A and D

Question 80 of 307

A company uses Dynamics 365 Business Central to manage receivables.

You must import a series of payments from a bank account and automatically match the payments against similar ledger entries already entered in Business Central.

You need to import and apply the payments to the ledger entries that are automatically matched by the system.

Which form should you use?

Answer choices

A Payment services

B Payment Application Rules

C Payment Reconciliation Journal

D Payment Registration

Correct answer: C

To import a series of payments from a bank account and automatically match them against similar ledger entries already entered in Business Central, you should use the Payment Reconciliation Journal form. This form allows you to import bank statement files or feeds and automatically reconcile payments by matching them with the corresponding customer or vendor ledger entries. It provides an efficient way to manage receivables and ensures accurate application of payments to their respective entries in the system.
