

Question 81 of 307

HOTSPOT -

You complete the sales invoicing process for a company.

You need to validate the setup.

Which setup should you check for each process? To answer, select the appropriate options in the answer area.

Answer Area	Process	Setup
	Create a shipment document for every item sale.	▼ Document Sending Profiles General Ledger Setup No. Series Sales & Receivables Setup
	Store PDF files of sales invoices and credit memos automatically at the end of each day.	▼ Document Sending Profiles General Ledger Setup Inventory Setup Sales & Receivables Setup

Suggested answer

Box 1: No. Series -

No. Series: For each company that you set up, you need to assign unique identification codes to things such as general ledger accounts, customer and vendor accounts, invoices, and other documents. Numbering is important not only for identification. A well-designed numbering system also makes the company more manageable and easy to analyze, and can reduce the number of errors that occur in data entry.

Box 2: Document Sending Profiles

You can set each customer up with a preferred method of sending sales documents, so that you do not have to select a sending option every time you choose the Post and Send action.

On the Document Sending Profiles page, you set up different sending profiles that you can select from in the Document Sending Profile field on a customer card.

Answer Area	Process	Setup
	Create a shipment document for every item sale.	▼ Document Sending Profiles General Ledger Setup No. Series Sales & Receivables Setup
	Store PDF files of sales invoices and credit memos automatically at the end of each day.	▼ Document Sending Profiles General Ledger Setup Inventory Setup Sales & Receivables Setup

Question 82 of 307

You are creating payment terms.

A company processes standard vendor payments on the seventh day of the next month.

You need to set up payment terms for the vendor.

Which date formula should you use?

Answer choices

A 37D

B 1M+7D

C 1M+6D

D CM+7D

Correct answer: D

To set up payment terms so that vendor payments are processed on the seventh day of the next month, you would use the formula CM+7D. CM stands for the end of the current month, and +7D adds seven days to this date, effectively making it the seventh day of the following month. This formula ensures that no matter which day of the current month the invoice is processed, the payment due date will always fall on the 7th of the next month.

Question 83 of 307

A company purchases items by using cash. You register a vendor payment when you a post a purchase invoice for a cash vendor.

You are creating a new cash vendor. No prior vendors have been set up as cash vendors.

You need to set up the vendor so that payments post automatically when you post a purchase invoice.

Which type of setup should you use?

Answer choices

A Payment Method as Cash

B Payment Term as COD

C Payment Method as Cash with balancing account

D Prepayment

Correct answer: C

To set up a vendor so that payments post automatically when you post a purchase invoice, you should configure the payment method as 'Cash' and specify a balancing account. This setup ensures that when a purchase invoice is posted, the corresponding payment is automatically recorded against the specified account, facilitating immediate settlement of the invoice.

Question 84 of 307

DRAG DROP -

You need to configure a new journal template.

What should you do? To answer, drag the appropriate fields to the correct requirements. Each field may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Fields	Answer Area	Field
Force Doc. Balance	Requirement Create journal lines that must balance by document number and document type.	Field
Bal. Account Type and Bal. Account No.	Create journal lines that must specify a default balancing account.	Field
Source Code	Create journal lines that use the origin of the entry as the basis for an audit trail.	Field
Reason Code	Create journal lines that must include a reason why an entry was made and can be used for the audit trail.	Field

Suggested answer

Fields	Answer Area	Field
Force Doc. Balance	Requirement Create journal lines that must balance by document number and document type.	Force Doc. Balance
Bal. Account Type and Bal. Account No.	Create journal lines that must specify a default balancing account.	Bal. Account Type and Bal. Account No.
Source Code	Create journal lines that use the origin of the entry as the basis for an audit trail.	Source Code
Reason Code	Create journal lines that must include a reason why an entry was made and can be used for the audit trail.	Reason Code

Question 85 of 307

Monetary amounts for local currency must always display three decimal places.

In General Ledger Setup, you need to configure the appropriate setup field with the appropriate value.

What should you do?

Answer choices

A Set the value of Amount Decimal Places to 3:3

B Set the value of Unit-Amount Decimal Places to 3:3

C Set the value of Inv. Rounding Precision to 0.001

D Set the value of Unit-Amount Rounding Precision to 0.001

E Set the value of Amount Rounding Precision to 0.001

Correct answer: A

The value of Amount Decimal Places set to 3:3 ensures that monetary amounts will always display three decimal places. The two numbers in the setting indicate both the minimum and maximum number of decimal places to be displayed. Thus, configuring this field to 3:3 ensures that amounts will consistently show three decimal places as required.

Question 86 of 307

HOTSPOT

A bank is implementing Dynamics 365 Business Central.

Each bank account must be configured to a unique G/L Account.

You need to set up the first bank account.

How should you configure the system? To answer, select the appropriate options in the answer area.

Answer Area

Control	Assignment
Bank Account Nos.	▼ Bank Account Posting groups General Ledger Setup Cash Flow Setup Source Code Setup
G/L Account for the bank account	▼ General Business Posting group Bank Account Posting group General Posting Setup Bank Account Currency Code

Correct Answer

Answer Area

Control	Assignment
Bank Account Nos.	▼ Bank Account Posting groups General Ledger Setup Cash Flow Setup Source Code Setup
G/L Account for the bank account	▼ General Business Posting group Bank Account Posting group General Posting Setup Bank Account Currency Code

Question 87 of 307

A company has been using Dynamics 365 Business Central for many years.

A new accounting manager for the company reviews the chart of accounts. The manager wants to remove some general ledger accounts.

The Check G/L Account Usage field is selected in the General Ledger Setup.

You need to assist with the account deletions.

What is one requirement that enables deletion of a general ledger account?

Answer choices

A The account cannot be used in any posting groups or posting setup

B The account cannot be used in any account schedule.

C The general ledger account cannot allow for direct posting.

D The account must have ledger entries.

Correct answer: A

To delete a general ledger account in Dynamics 365 Business Central, it must not be used in any posting groups or posting setup. This is because if the Check G/L Account Usage field is selected in the General Ledger Setup, the system requires that the account not be linked to any posting groups or setup to ensure consistent and accurate reporting within the general ledger.

Question 88 of 307

The general ledger account for accounts receivable must match the sum of all balances on the customer cards.

You need to set up the general ledger account card for accounts receivable to meet this requirement.

What should you do?

Answer choices

A Configure the account type.

B Block the account.

C Configure totaling.

D Disallow direct posting.

Correct answer: D

To ensure that the general ledger account for accounts receivable matches the sum of all balances on the customer cards, direct posting must be disallowed. This prevents any manual entries directly into the accounts receivable account, ensuring that all entries are only posted through customer transactions, thus maintaining the integrity and reconciliation of the balances.

Question 89 of 307

HOTSPOT -

A company uses Dynamics 365 Business Central.

The company wants to automate sales credit memo processing.

You need to configure the system to meet the requirements.

What should you do? To answer, select the appropriate options in the answer area.

Answer Area

Requirements	Action
Ensure that the costs on credit memos match the costs from the originating invoice.	Select Exact Cost Reversing Mandatory Choose a No.Series for Posted Credit Memo Nos. Choose Yes to Archive Return Orders Add a Sales Credit Memo Account in General Posting Setup
Process the receipt of a return at the same time the credit memo is posted.	Select Return Receipt on Credit Memo Select Shipment on Invoice Choose Skip Manual Reservation Choose Blank for Default Quantity to Ship
List a default quantity of one on the credit memo lines.	Choose Yes for Default Item Quantity Choose Remainder for Default Quantity to Ship Choose No for Default Item Quantity Choose Blank for Default Quantity to Ship

Suggested answer

Answer Area

Question 90 of 307

DRAG DROP -

You are implementing Dynamics 365 Business Central. The accounting manager of the company provides you with the chart of accounts.

You need to set up specific posting groups according to the chart of accounts.

Which setup should you use? To answer, drag the appropriate setup to the correct action. Each setup may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Setups	Answer Area	
	Action	Setup
Bank Account Posting Groups	Automatic posting of received payment differences from customers	Setup
Customer Posting Groups	Automatic posting to the payables account	Setup
Inventory Posting Groups and Inventory Posting Setup	Automatic posting to different work in progress balance accounts, depending on the location	Setup
Vendor Posting Groups		
General Posting Setup		

Suggested answer

Setups	Answer Area	
	Action	Setup
Bank Account Posting Groups	Automatic posting of received payment differences from customers	Customer Posting Groups
Customer Posting Groups	Automatic posting to the payables account	Vendor Posting Groups
Inventory Posting Groups and Inventory Posting Setup	Automatic posting to different work in progress balance accounts, depending on the location	Inventory Posting Groups and Inventory Posting Setup
Vendor Posting Groups		
General Posting Setup		

Question 91 of 307

You copy a General Posting Setup from an instance of Dynamics 365 Business Central.

You must configure the General Posting Setup.

You assign a category and subcategory to each account.

You need to complete the configuration as efficiently as possible.

What are three ways to complete the configuration? Each correct answer presents a complete solution.

- A Use the Copy action to create a new General Posting Setup Card
- B Import a configuration package that contains the General Posting Setup
- C Use the Suggest Accounts action to create all possible posting setup combinations
- D Create a new General Posting Setup Card, and then use the Suggest Accounts action
- E Create a new General Posting Setup Card, and then use the Copy action

Correct answers: A, B, C

To complete the configuration of the General Posting Setup efficiently, you can use the Copy action to create a new General Posting Setup Card, import a configuration package that contains the General Posting Setup, and use the Suggest Accounts action to create all possible posting setup combinations. These methods ensure that you leverage existing setups, configurations, and automated tools to streamline the process.

Question 92 of 307

HOTSPOT -

A company is implementing Dynamics 365 Business Central.

The accountant must be able to report discounts received on purchased items separately from costs.

You need to configure the system to meet the requirement.

How should you configure the system? To answer, select the appropriate configurations in the answer area.

Answer Area

Area	Configuration
Purchase & Payables Setup	Invoice Discounts for Discount Posting Adjust for Payment Disc. Line Discounts for Discount Posting Calc. Inv. Discount
General Posting Setup	Purch. Account Purch. Inv. Disc. Account Purch. Line Disc. Account Purchase Variance Account

Suggested answer

Answer Area

Area	Configuration
Purchase & Payables Setup	Invoice Discounts for Discount Posting Adjust for Payment Disc. Line Discounts for Discount Posting Calc. Inv. Discount
General Posting Setup	Purch. Account Purch. Inv. Disc. Account Purch. Line Disc. Account Purchase Variance Account

Question 93 of 307

A company is implementing Dynamics 365 Business Central.

The company needs to post monthly general journal batches for purchase expenses incurred throughout the month. The posted entries must have unique, incremental document numbers. The numbers must increment by one and be sequential. You need to configure the system to meet the requirements. Which three actions should you perform in sequence? Each correct answer presents part of the solution.

Answer choices

A Create a Template Batch with Posting No. Series.

B Create the No. Series.

C Configure a General Journal with Purchase Reason Code.

D Configure a General Journal Template with Purchase Type.

E Create a Template Batch with No. Series.

Correct answers: ABD

Question 94 of 307

DRAG DROP -

An accountant discovers inconsistencies between financial statements and balances in the chart of accounts.

You suspect that the discrepancies might be a result of missing categories and subcategories.

You need to ensure that the financial statements match the chart of accounts.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create subcategories for each category.

Rename the general ledger account to match the category and subcategory in the chart of accounts.

Verify that the financial statements match the chart of accounts.

Add the accounts to the analysis view.

Add the missing categories and subcategories to the general ledger accounts.

Answer Area

Suggested answer

Reference:

<https://docs.microsoft.com/en-gb/dynamics365/business-central/finance-general-ledger>

Actions

Create subcategories for each category.

Rename the general ledger account to match the category and subcategory in the chart of accounts.

Verify that the financial statements match the chart of accounts.

Add the accounts to the analysis view.

Add the missing categories and subcategories to the general ledger accounts.

Answer Area

Create subcategories for each category.

Add the missing categories and subcategories to the general ledger accounts.

Verify that the financial statements match the chart of accounts.

Question 95 of 307

DRAG DROP -

You set up a new company for a customer. The customer provides you with the chart of accounts and the preferred grouping of items, vendors, and customers.

You must ensure that item posting corresponds with the grouping preferences and chart of accounts for the customer.

You need to create the posting groups and setup.

Which type of posting groups should you create? To answer, drag the appropriate posting group types to the correct entities. Each posting group type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Posting group types

Specific posting groups

General posting groups

Answer Area

Entity	Posting group type
Sales	Posting group type
Cost of goods sold	Posting group type
Customer receivables	Posting group type
Vendor payables	Posting group type

Suggested answer

Sales	General posting groups
Cost of goods sold	General posting groups
Customer receivables	Specific posting groups
Vendor payables	Specific posting groups

Question 96 of 307

HOTSPOT -

You are implementing Dynamics 365 Business Central.

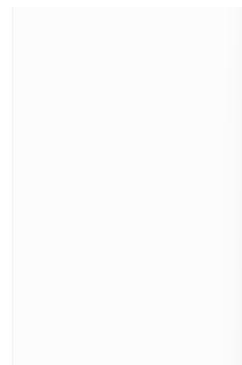

You are creating an expense account for office supplies in the chart of accounts. The account may be used for purchase invoice transactions as well as general journal transactions.

You need to configure the remaining options for the account.

Which values should you use? To answer, select the appropriate options in the answer area.

Answer Area

Account option	Value
Account Category	▼ Expense Cost of Goods Sold Income Liabilities
Income / Balance	▼ Balance Sheet Income Statement
Direct Posting	▼ Yes No

Suggested answer

Answer Area

Account option	Value
Account Category	▼ Expense Cost of Goods Sold Income Liabilities
Income / Balance	▼ Balance Sheet Income Statement
Direct Posting	▼ Yes No

Question 97 of 307

HOTSPOT -

You are implementing Dynamics 365 Business Central for a customer. The local currency code (LCY) for the company is set to US dollars (\$).

The customer plans to set up a bank account. The customer provides the following information for the account:

Account number

- Name
- Address
- Bank account posting group

The account must meet the following requirements:

- Use US dollars.
- Use 9075 as the number of the next bank account statement for reconciliation in Business Central.

You need to set up the account for the customer.

Which values should you use? To answer, select the appropriate options in the answer area.

Answer Area

Field	Value
Currency Code	<blank> USD \$
Last Statement No.	9074 9075

Suggested answer

Answer Area

Field	Value
Currency Code	<blank> USD \$
Last Statement No.	9074 9075

Question 98 of 307

You are setting up Dynamics 365 Business Central.

You need to define the Direct Cost Applied account.

Where should you define the accounts for Direct Cost Applied?

Answer choices

A Item Cards

B Inventory Posting Setup

C General Posting Setups

D Vendor Posting Groups

Correct answer: C

Question 99 of 307

A company plans to verify that purchase invoices use agreed-upon prices and discounts.

The company is configuring settings on a vendor card. The company receives a validation error when creating a purchase order for the vendor.

You need to find out which setting is causing the validation error.

Which configuration option on the vendor card must you populate?

Answer choices

A Order address

B Location code

C Vendor Template

D Purchase Prices

E Vendor Posting Group

Correct answer: E

To verify that purchase invoices use agreed-upon prices and discounts, it is essential to have the Vendor Posting Group configured on the vendor card. Without this setting, the system will not be able to process the purchase order correctly and will throw a validation error. The Vendor Posting Group determines how transactions with the vendor are posted in the general ledger, which is crucial for the successful creation and validation of purchase orders and invoices.

Question 100 of 307

DRAG DROP -

You are setting up the general journals and batches for an accounting department.

The accounting department has multiple users who will work simultaneously within different general journals.

You need to set up the different journal templates and batches for each user according to the company's requirements.

Which options should you use? To answer, drag the appropriate options to the correct requirements. Each option may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Options	Answer Area	
	Requirement	Option
Force Doc. Balance	Prefill the amount on journal lines based on the document number.	Option
No. Series	Assign document numbers to ledger entries, independently from the user's journal batch.	Option
Posting No. Series	Balance the journal lines by document type.	Option
Standard Journal Code		
Suggest Balancing Amount		

Suggested answer

Options	Answer Area	
	Requirement	Option
	Prefill the amount on journal lines based on the document number.	Suggest Balancing Amount
No. Series	Assign document numbers to ledger entries, independently from the user's journal batch.	Posting No. Series
	Balance the journal lines by document type.	Force Doc. Balance
Standard Journal Code		

Question 101 of 307

DRAG DROP -

A company uses Dynamics 365 Business Central.

You need to configure payment terms with the correct due date calculation formula.

What should you do? To answer, drag the appropriate values to the correct requirements. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer Area

Values	Due Date Calculation	Value
D10	10 days from today	
10D	The next 10 th day of the next month	
1M + 10D	One month + 10 days	

Suggested answer

Reference:

<https://docs.microsoft.com/en-us/dynamics365/business-central/ui-enter-date-ranges>

Answer Area

Values	Due Date Calculation	Value
D10	10 days from today	10D
10D	The next 10 th day of the next month	D10
1M + 10D	One month + 10 days	1M + 10D

Question 102 of 307

A company uses Dynamics 365 Business Central for their receivables.

The company wants to mark any automatically matched payments to open invoices as not requiring a review if they match the highest degree of confidence that the two transactions are a match.

You need to configure payment matching rules.

Which three criteria should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Answer choices

A Statement amount

B Account number

C Related-party fields

D Transaction date

E Transaction text

Correct answer: ACE

Question 103 of 307

DRAG DROP -

You are implementing Dynamics 365 Business Central.

The accounting manager for the company provides you with a chart of accounts.

You need to set up the general ledger accounts correctly.

Which setups should you use? To answer, drag the appropriate setups to the correct requirements. Each setup may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Answer Area

Setups	Requirement	Setup
Account Category and Account Subcategory	The balance on the general ledger account for inventory must match the sum of all value entries on the item cards.	
Account Type	The general ledger account must be reported on one of the Financial Statements reports.	
Direct Posting	The general ledger account must summarize the balance of other general ledger accounts.	
Income/Balance	The general ledger account must be closed during year-end closing procedures.	

Suggested answer

Answer Area

Setups	Requirement	Setup
Account Category and Account Subcategory	The balance on the general ledger account for inventory must match the sum of all value entries on the item cards.	Direct Posting
Account Type	The general ledger account must be reported on one of the Financial Statements reports.	Account Type
Direct Posting	The general ledger account must summarize the balance of other general ledger accounts.	Account Category and Account Subcategory
Income/Balance	The general ledger account must be closed during year-end closing procedures.	Income/Balance

Question 104 of 307

A company uses Dynamics 365 Business Central.

Which field is used to calculate the Due Date based on the Payment Terms?

Answer choices

A Order Date

B Due Date

C Posting Date

D Document Date

Correct Answer: D

The correct answer is **Document Date**.

Business Central calculates:

Due Date = Document Date + Due Date Calculation from the Payment Terms

For example: Document Date **2 October** + payment term **30D** = Due Date **1 November**.

Microsoft confirms that document dates, not posting dates, are used for this calculation.

Question 105 of 307

A company uses Dynamics 365 Business Central. All activity in the system is based on the company's local currency.

Sales invoice amounts must be rounded to the nearest interval based on amount.

You need to complete the configuration.

Where should you configure the setup?

Answer choices

A Currency Card

B General Ledger Setup

C Sales & Receivable Setup

D Currency Exchange Rates

The correct answer is B - **General Ledger Setup**.

Because transactions use the company's **local currency (LCY)**, configure these fields on the **General Ledger Setup** page:

- **Inv. Rounding Precision:** the rounding interval, such as 0.05
- **Inv. Rounding Type:** the rounding direction or method

The **Currency Card** is used when configuring invoice rounding for a **foreign currency**.

Question 106 of 307

A company has been using Dynamics 365 Business Central for many years.

A new accounting manager for the company reviews the chart of accounts. The manager wants to remove some general ledger accounts.

The Check G/L Account Usage field is selected in the General Ledger Setup.

You need to assist with the account deletions.

What is one requirement that enables deletion of a general ledger account?

Answer choices

A The account cannot have a balance amount.

B The account cannot be used in any account schedule.

C The general ledger account is configured to allow for deletion

D The account must have ledger entries.

Correct answer: A

To delete a general ledger account in Dynamics 365 Business Central, one of the main requirements is that the account cannot have a balance amount. If an account has a balance, it cannot be deleted to ensure the integrity of financial records. This ensures that historical financial data remains accurate and complete.

Question 107 of 307

A company uses Dynamics 365 Business Central. You manage customer master data for the company.

You need to create new customers.

What are three possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Answer choices

- A On the Contacts page, select Related Information and then select Customer.
- B On the Contacts page, select Create as Customer.
- C On the Configuration Template Header for the customer table, select Create Instance.
- D On the Customers page, select New.
- E On the Customer card, select Apply Template.

Correct answers: A, B, D

To create new customers in Dynamics 365 Business Central, there are three possible ways: First, on the Contacts page, by selecting Related Information and then selecting Customer, allowing the creation of a customer directly linked to the contact. Second, on the Contacts page, by selecting Create as Customer, which facilitates the direct conversion of contact information into customer data. Third, on the Customers page, by selecting New, enabling the creation of a new customer record from scratch. These methods provide complete solutions for creating new customers within the system.

Question 108 of 307

A company uses Dynamics 365 Business Central.

You must create a general ledger account and define the general ledger account as a purchase account for general journal transactions.

You need to configure the system.

Answer choices

A Select Purchase as the value for the Gen. Posting Type field.

B Assign a general product posting group that is linked to a purchase account.

C Link combination of the general business posting group and general product posting group to a purchase account.

D Assign a general business posting group that is linked to a purchase account.

Correct answer: A

To define a general ledger account as a purchase account for general journal transactions in Dynamics 365 Business Central, you must select 'Purchase' as the value for the 'Gen. Posting Type' field. This configuration ensures that the general ledger account is used specifically for recording purchases made by the company. Assigning or linking posting groups or combinations of posting groups are related to different configurations and do not directly establish the account as a purchase account for general journal transactions.

Question 109 of 307

DRAG DROP -

You are setting up new customers and items in Dynamics 365 Business Central.

You need to configure the system.

Which posting group should you use? To answer, drag the appropriate posting groups to the correct use cases. Each posting group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Posting groups	Requirement	Posting group
Gen. Bus.	Identify income statement accounts used for customer transactions.	Posting group
Gen. Prod.	Identify balance sheet accounts used for customer transactions.	Posting group
Customer	Identify income statement accounts used for item transactions.	Posting group
Inventory	Identify balance sheet accounts used for item transactions.	Posting group

Suggested answer

Box 1: Gen. Bus.

General Business -

The revenue posting (income statement) is determined by the combination of the general business posting group and the general product posting group.

Box 2: Customer

The accounts receivable posting (balance sheet) is determined by the customer posting group.

Box 3: Gen. Prod.

General product -

The cost of goods sold posting (income statement) is determined by the combination of general business posting group and general product posting group.

Box 4: Inventory

The inventory posting (balance sheet) is determined by the inventory posting group.

Reference:

Posting groups	Requirement	Posting group
Gen. Bus.	Identify income statement accounts used for customer transactions.	Gen. Bus.
Gen. Prod.	Identify balance sheet accounts used for customer transactions.	Customer
Customer	Identify income statement accounts used for item transactions.	Gen. Prod.
Inventory	Identify balance sheet accounts used for item transactions.	Inventory

Question 110 of 307

A company implements Dynamics 365 Business Central.

You need to create a new payment terms record to meet the following requirements:

- Ensure that the due date for all vendor invoices is 30 days.
- Grant vendors a two percent discount if an invoice is paid within 10 days.

Which three actions should you perform? Each correct answer presents a part of the solution

NOTE: Each correct selection is worth one point.

Answer choices

A Set the value of the Discount Date Calculation field to 2D.

B Set the value of the Discount Date Calculation field to 10D.

C Set the value of the Discount % field to 2.

D Set the value of the Due Date Calculation field to 30D.

E Set the value of the Discount % field to 10.

Correct answers: B, C, D

To meet the requirements of ensuring that the due date for all vendor invoices is 30 days and granting vendors a two percent discount if an invoice is paid within 10 days, you need to: Set the value of the Discount Date Calculation field to 10D, which specifies that the discount is available if the invoice is paid within 10 days; set the value of the Discount % field to 2 to apply a 2% discount for early payment; and set the value of the Due Date Calculation field to 30D to calculate the payment due date as 30 days from the invoice date. These actions ensure the correct setup for the payment terms in Dynamics 365 Business Central.

Question 111 of 307

A company is implementing Dynamics 365 Business Central.

Vendor open balances need to be posted to the general ledger (G/L) account directly by using the general journal.

You need to configure the G/L account to allow users to post vendor open balances to payables accounts.

Which setting should you use?

Answer choices

A Account Category

B Income/Balance

C Default Deferral template

D Direct Posting

Correct answer: D

To post vendor open balances directly to payables accounts using the general journal in Dynamics 365 Business Central, you need to configure the G/L account to allow direct postings. Enabling the 'Direct Posting' setting allows users to post transactions directly to that G/L account without requiring an intermediary posting group. This setting is essential in cases where you need to post entries directly to specific accounts like payables or receivables.

Question 112 of 307

A company uses Dynamics 365 Business Central.

A user posts a Sales Invoice document that has an incorrect dimension value.

You need to update general ledger entries with the correct dimension value without inserting new ledger entries.

Which option should you use?

Answer choices

A Correct Dimensions

B Edit List

C Edit In Excel

D Reverse Transaction

Correct answer: A

On the General Ledger Entries page, the Correct Dimensions action allows users to correct dimensions on posted entries by editing the dimension value without inserting new ledger entries. This feature ensures that general ledger entries can be updated with the correct dimension values, which aligns with the requirement of updating entries without adding new ones.

Question 113 of 307

DRAG DROP -

A company uses Dynamics 365 Business Central.

You need to configure the system to meet the following requirements for a purchasing agent:

- Create and post purchase documents including purchase receipt lines.
- Do not allow agents to read general ledger (G/L) or bank balances.
- Restrict access to view G/L amounts.
- Ensure that purchasing agents can select G/L codes on purchase documents.

You need to restrict access to view G/L amounts.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer area
Select the permissions sets that you want to modify.		
Remove page permissions for the G/L account list page.		
Remove page permissions for chart of accounts, G/L entries and G/L account card.	➤	⬆
In the Field Filter column, set the value to 1500 .	⬅	⬇
Assign a permission set to a user.		
In the row for the G/L account table, select the Security Filter column.		

Suggested answer

Box 1: Select the permission sets you want to modify.

Update the user permission sets in Dynamics 365 Business Central, removing the current permission set and adding the new permission set.

Box 2: Remove page permissions for chart of accounts, G/L entries, and G/L account card.

Box 3: Assign a permission set to a user.

Actions		Answer area
		Select the permissions sets that you want to modify.
Remove page permissions for the G/L account list page.		Remove page permissions for chart of accounts, G/L entries and G/L account card.

In the Field Filter column, set the value to 1500 .	⬅	Assign a permission set to a user.
		⬇
In the row for the G/L account table, select the Security Filter column.		

Question 114 of 307

HOTSPOT -

A company uses Dynamics 365 Business Central. You are recording incoming payments from customers.

You must record a payment of \$500 for customer 2030 with a posting date of November 16, 2022. The payment must be recorded against bank account No. 1010 with general ledger (G/L) account No. 10100.

You need to populate the cash receipt journal batch in Business Central to properly record the incoming payment to a bank account.

Which value should you use? To answer, select the appropriate options in the answer area,

Answer Area

Cash receipt journal field	Value
Account Type	Customer G/L account Bank account
Account No.	2030 1010
Amount	\$500 -\$500
Bal. Account Type	Customer G/L account Bank account
Bal. Account No.	2030 1010 10100

Question 115 of 307

A company uses Dynamics 365 Business Central.

An accountant must post sales services in a journal by using a predefined alphanumeric sequence. The accountant is using multiple general journal batches.

You need to configure invoice numbers for the journal.

Which two fields should you populate? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Answer choices

A Posting No. Series field in General Journal Templates

B No. Series field in General Journal Batches

C No. Series field in General Journal Templates

D Posting No. Series field in General Journal Batches

Correct answers: C, D

To configure invoice numbers for the journal in Dynamics 365 Business Central, you need to set the No. Series field in General Journal Templates and the Posting No. Series field in General Journal Batches. The No. Series field in General Journal Templates defines the sequence for the journal headers, while the Posting No. Series field in General Journal Batches determines the sequence for the journal lines.

Question 116 of 307

You are configuring Dynamics 365 Business Central for a client.

Invoice amounts in the local currency code must be rounded to hundredths.

You need to configure the Inv. Rounding Precision (LCY) field in General Ledger Setup.

Which value should you use?

Answer choices

A 0.01

B 0.20

C 1.00

D 1.11

E 2.00

Correct answer: A

To ensure that invoice amounts in the local currency code are rounded to hundredths, the Inv. Rounding Precision (LCY) field should be set to 0.01. This value represents the smallest increment to which amounts will be rounded, corresponding to one-hundredth of the currency unit, which is exactly what is required.

Question 117 of 307

DRAG DROP

You set up a new company for a customer.

The customer requires that two global dimensions be automatically checked at transaction when income statement accounts are used.

You need to set up the requirements for all income statement accounts at once.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer area	
Navigate to Account and select Dimensions-Single .	 	1	 
Set up the Dimension Value Code in General Ledger Setup.		2	
Navigate to Account and select Dimensions-Multiple .		3	
Define the dimension code and change Value Posting to Code Mandatory.		4	
Navigate to Chart of Accounts and select the Filter option in the Income/Balance column.			
Select all income statement accounts.			

Suggested answer

Answer area	
1	Navigate to Chart of Accounts and select the Filter option in the Income/Balance column.
2	Select all income statement accounts.
3	Navigate to Account and select Dimensions-Multiple .
4	Define the dimension code and change Value Posting to Code Mandatory.

Question 118 of 307

HOTSPOT

- -

A company uses Dynamics 365 Business Central. You are creating a general ledger (G/L) for a checking account in the chart of accounts.

You need to populate the fields on the G/L account card.

Which value should you select? To answer, select the appropriate options in the answer area.

Answer Area

Field	Value
Income/Balance	Income statement Balance sheet
Account Category	Assets Liabilities Equity Income Expense
Account Type	Code Mandatory Same Code No Code
Direct Posting	Enabled Disabled

Question 119 of 307

A company based in the United States uses Dynamics 365 Business Central.

A customer agrees to buy raw materials in the MXN (Mexican Peso) currency.

You need to set up the currency and exchange rates for this purchase.

What should you do?

Answer choices

A Do not configure the currency MXN and recalculate all entries in USD before posting.

B Configure the currency MXN, then set up the Currency Exchange Rate Service to upload currency rates automatically.

C Use the currency MXN as a local currency in the system, then set the exchange rates manually before posting.

D Use the currency MXN as an additional reporting currency, then set up the Currency Exchange Rate Service to upload rates automatically.

Correct answer: B

To facilitate a purchase in MXN while operating within the United States, you should configure the currency MXN within Dynamics 365 Business Central. By setting up the Currency Exchange Rate Service to upload currency rates automatically, you ensure that the exchange rates are kept accurate and up-to-date. This approach streamlines the handling of transactions in a foreign currency, maintaining the integrity and accuracy of financial records without manual intervention.

Question 120 of 307

A company uses Dynamics 365 Business Central. The company has a customer that will also be a vendor for the company in the next financial year.

The company plans to consolidate the customer and vendor balances to reduce unnecessary payments on receipts and reduce the amount of transaction fees.

You need to configure the contact card.

Which option should you configure first?

Answer choices

A Create as Employee

B Create as Customer

C Create as Bank

D Create as Vendor

Correct answer: B

In Dynamics 365 Business Central, you need to configure the contact card by creating a record first. Since the company has a customer that will also become a vendor, the logical starting point is to create the contact as a Customer. This allows you to establish the initial relationship and later consolidate customer and vendor balances as needed. Starting with a customer configuration aligns with the initial role of the entity before it transitions to also being a vend
